

FOR IMMEDIATE RELEASE

Daystar Welcomes Charles Bean to its Professional Services Group

Local IT provider expands team with new Systems Administrator to enhance technology support for area businesses

Newington, NH, October 20, 2015 – With a goal of providing customer-centric, expert technology support for area businesses and organizations, Daystar is pleased to announce the addition of Charles Bean to its Professional Services Group (PSG). Bean joins Daystar with more than eighteen years’ experience in technology support and systems administration. His main focus is onsite support for key Daystar clients, as well as support escalation response.

“We are thrilled to add Chuck to the Daystar team,” says Mike Ransom, PSG manager for Daystar. “Our objective is to facilitate our clients’ success through the efficient use of technology. Chuck’s breadth of knowledge of various technologies, coupled with his ability to look at technology from a holistic business perspective, ensures that he will be a vital part of our client services team.”

Bean’s proficiency in translating technology solutions through a business lens complements Daystar’s customer-centric approach to technology. Bean, along with the rest of the Daystar team, employs proactive, business-centered methodologies to implement technology solutions customized and aligned to a client’s unique business goals and needs.

A Microsoft certified professional, Bean’s technology expertise and growing skillset have been honed through his work with area managed service providers and technology support companies. His background includes experience with network, server, virtual, and workstation environments. He has also developed proficiencies in data backup, storage, antivirus, active directory, Microsoft Exchange, Office 365, and more. In addition, Bean is proficient in both Windows and Mac OS support.

About Daystar

Daystar is a managed services provider and technology integrator for hundreds of small to mid-sized businesses. Located in Newington, NH, Daystar was founded in 2000 with a single guiding principle: to deliver complete technology solutions and services designed to meet the individual needs and goals of a diverse base of client companies. Daystar’s main goal is to help clients learn how they can save time and money by efficiently leveraging computer and networking technology. Daystar proudly applies its core values of quality service, business integrity, and efficient processes to each of its services including: network design and

integration; server maintenance; network monitoring; virtualization; cloud integration; network security; e-mail; data backup and protection; VoIP integration; wiring; wireless; disaster recovery; customized database design; and hardware sales and services.
